---

## Education

**Bachelor's Degree, Computer Software Engineering** — University of Peloponese

---

## Experience

### P&I Hellas - Java Developer

**Apr 2023 - Jun 2025**

- Actively contributed to all phases of the software development lifecycle, including analysis, design, development, testing, and deployment, ensuring high-quality and efficient project execution.
  - Worked in Agile environments, participating in daily stand-up meetings and collaborating with cross-functional teams to drive progress and solve technical challenges.
  - Engineered and implemented scalable Java EE applications, ensuring maintainability and performance.
  - **Took additional initiative to develop and optimize React-based user interfaces**, integrating them seamlessly with backend services to enhance the product's user experience—going beyond core Java responsibilities to deliver a complete front-end solution.
  - Leveraged Drools (Business Rules Engine) to implement complex business logic, improving system efficiency and maintainability.
  - Designed and implemented RESTful APIs and microservices architecture to enhance scalability and system integration.
  - Ensured adherence to best practices in Object-Oriented Programming (OOP) and applied design patterns for scalable and maintainable software solutions.
  - Contributed to database management using PostgreSQL, optimizing queries and ensuring high availability.
- 

## Languages

- **Greek** — Native
  - **English** — Fluent
  - **German** — Beginner
-

# **Skills & Tools**

## **Programming Languages**

Java EE, Java, XML, React, JavaScript, SQL, GWT

## **Technologies**

Webpack, PostgreSQL, BIRT Designer, RESTful APIs, Drools, Hibernate

## **Version Control & Collaboration Tools**

Git, GitLab, CVS, SVN

## **Build & Deployment Tools**

Maven, WildFly, Jenkins

## **Development Tools**

Postman, Insomnia

## **Soft Skills**

Teamwork, Communication, Problem Solving, Adaptability, Time Management, Continuous Learning
